**RE: Application for Attachment – IT Infrastructure & Cyber Engineering**

Dear Hiring Manager,

I am writing to express my interest in the **IT Infrastructure & Cyber Engineering Attachment Program** at **CTFROOM** for the period **May to August 2025**. I am currently pursuing a **Bachelor of Science in Computer Science** at **Daystar University,** and I am passionate about system infrastructure, security operations, and hands-on cybersecurity engineering.

CTFROOM's mission to advance cyber skills development across Africa resonates with my career goals. I am particularly drawn to your focus on **cyber range environments and community engagement**, which I see as an excellent opportunity to grow both technically and professionally.

Through my internship in the ICT Support department at Daystar University, I have built practical experience in **Windows/Linux systems, network troubleshooting, and IT support operations**. I am also continuously advancing my skills in **Linux administration, scripting, virtualization, and cloud technologies like AWS and Azure**.

I am excited about the chance to support **CTFROOM's technical team**, especially in areas such as **infrastructure management, vulnerability and patch management, event deployments, and system monitoring**. I am a hands-on learner, detail-oriented, and

thrive in dynamic environments. I also enjoy participating in cybersecurity communities and CTF challenges, which has helped me sharpen my operational skills.

I would appreciate the opportunity to learn from and contribute to the **CTFROOM team** during this attachment period. Thank you for your time and consideration.

Sincerely,

Felix Eladi
