Felix Eladi

SUMMARY

Computer Science undergraduate passionate about cybersecurity, systems programming, and computer networking. Experienced in securing Linux/Windows environments and building mobile apps, web applications, and system-level tools. Proficient in C/C++, Python, Laravel, and Flutter. Known for a hands-on, security-first approach to development and continuous learning. Actively seeking internships or junior roles in software or security engineering.

EXPERIENCE

AUGUST 2021 – JANUARY 2022
ICT Support Intern – Daystar University | Data Center

Key Responsibilities:

- Secured and maintained Daystar's entire network infrastructure (labs, data center, staff offices, libraries, Wi-Fi and fiber / ethernet cables).

- Managed switches, performed OS hardening, and reduced unauthorized access attempts by 15%.

- Configured and deployed secure OS environments on 100+ machines (Windows & Linux).

- Monitored and managed CCTV systems across 50+ endpoints including staff offices and public areas.

- Maintained and repaired student laptops; performed OS reinstalls and credential resets.

- Delivered tier-1 and tier-2 IT support to students, staff, and faculty.

- Oversaw structured cabling and device imaging, reducing downtime by 20%.

EDUCATION

Daystar University, Athi River
BSc. Computer Science (Ongoing), 2022 – Present

Daystar University, Athi River
Diploma in Information Technology, 2020 – 2022

BUTULA High School
KCSE Certificate, 2015 – 2019

P.O BOX 00100, Nairobi

Nairobi County

TECHNICAL SKILLS

Languages	C/C++, C#, Python, PHP, Dart, JavaScript
Frameworks	Laravel, Flutter, Qt, NodeJS
Security Tools	Nmap, Wireshark, Burp Suite, Metasploit
DevOps & Tools	Git, GitHub, Postman
Platforms	Windows, Ubuntu, Kali Linux, Android

INTERESTS	Cybersecurity, Low-Level Systems Engineering, Computer Networking, Machine Learning & Artificial Intelligence, Football
CERTIFICATION	The Vulnerability Analysis Course – Udemy
	Master Course in Zero Trust Architecture – Udemy
	Complete Computer Forensics Course – Udemy
	Flutter Clean Architecture with MVVM – Udemy

PROJECTS

JOB PORTAL SYSTEM | HTML, CSS, JAVASCRIPT AND LARAVEL

A Laravel-based platform connecting job seekers and employers. Features advanced search, real-time tracking, role dashboards, and application management.

www.github.com/Ela-El-maker/Job-Carrier-Portal

DEVICE-CONTROL SYSTEM | C / C++, PHP / LARAVEL, C++ / QT

Designing a cross-platform device control system to remotely lock, wipe, and monitor laptops using Android app with UEFI boot-level lock enforcement. (In Planning Phase)

COMMAND AND CONTROL SERVER | C# /HTML, CSS, JS AND PHP

A program that remotely connects to and controls another computer in the background is often called a remote access tool (RAT). It runs silently on the target machine, allowing the controller to send commands, access files, monitor activity, or control the system

www.letscode.felixeladi.co.ke/kim/rat/auth/login.php

TASKMAN APP | FLUTTER, HTML, CSS, JS AND PHP

Built an app to organize user's workflow, track progress using intuitive status labels (Pending, In Progress, Completed), and stay productive without the clutter of overly complex tools.

www.github.com/Ela-El-maker/TaskMan

DAYSTAR MAGAZINE | FLUTTER, DART, LARAVEL

A news platform for campus updates with support for live feeds, polls, and editorial management. Backend schema and content model currently under development.

www.github.com/Ela-El-maker/NewsPaper-App

PERSONAL PORTFOLIO | HTML, CSS, JAVASCRIPT AND LARAVEL

Built a portfolio to demonstrate my proficiency in both front-end and back-end development. The project was developed featuring an admin dashboard for easy content management.

www.portfolio.felixeladi.co.ke

BUSINESS PORTFOLIO | HTML, CSS, JAVASCRIPT AND LARAVEL

Built a business portfolio website was an excellent opportunity to hone my skills in creating client-focused web solutions. By integrating a user-friendly admin panel with dynamic content management.
